ABOUT THE HACKATHON

Healix AI HealthHack 2026 is a national **AI and healthcare innovation challenge** that brings together students, researchers, developers, and healthcare professionals to solve real-world healthcare problems using Artificial Intelligence.

OBJECTIVES

01

AI Innovation

Encourage innovation in AI-driven healthcare technologies.

02

Healthcare Impact

Address real-world clinical and public health challenges.

03

Collaboration

Promote interdisciplinary teamwork between technology and healthcare.

04

Prototype Development

Support research, rapid prototyping, and solution development.

05

Incubation Opportunities

Identify high-potential teams for mentorship and incubation through Healix Technologies.

Participants will research, prototype, and present innovative AI-driven healthcare solutions while receiving guidance from experienced mentors and expert judges.

WHO CAN PARTICIPATE

Undergraduate Students

Passionate learners with curiosity to solve real-world healthcare challenges.

Postgraduate Students

Advanced learners ready to innovate and build impact-driven solutions.

Researchers

Individuals exploring new frontiers in AI and healthcare.

Medical Students

Future healthcare leaders bringing clinical insights and compassion.

Engineering Students

Problem solvers building technology for a healthier tomorrow.

AI/ML Developers

Coders and AI enthusiasts creating intelligent healthcare solutions.

Healthcare Professionals

Doctors, nurses, and practitioners driving real-world impact.

Startups

Innovative teams and startups with bold ideas and vision.

RESEARCH COURSES

GUEST FACULTY

Dr. Suresh Bangla

AIIMS, New Delhi

Dr. Suresh Bangla is a postgraduate researcher in Community Medicine at AIIMS, New Delhi, specializing in AI in Healthcare, Public Health Research, Mental Health, and Healthcare Data Analysis. He is passionate about leveraging research and technology to develop evidence-based, scalable healthcare solutions and will share practical insights on research methodology, innovation, and real-world AI applications.

AREAS OF EXPERTISE

Community Medicine

AI in Healthcare

Public Health Research

Mental Health

Healthcare Data Analysis

Research Methodology

EVERY PARTICIPANT WILL RECEIVE

Digital Certificate of Participation

Access to Expert Mentor Sessions

Networking Opportunities

Community Membership

Learning Resources

AWARDS & RECOGNITION

Outstanding teams may receive:

Incubation Opportunity at Healix BioLabs

Internship Opportunities

Research Mentorship

Publication Support

Showcase on Healix Platforms

Letter of Recognition (based on performance)
